

Gunnebo, February 16, 2016

To all our valuable customer and partners for Gedevelop GFM system.

Starting from today have we taken the decision to discontinue production of our products GFM camera simulator, part no M1802002 and GFM Glass simulator, part no M1802008.

The reason is obsolescence of ingoing electronics components for building these products in combination with decreasing demands from our customers.

If the need for these simulators is shown to be of high importance for you as a customer, we will consider a redesign to start manufacturing of similar products again.

If there is a need for these type of support equipment please contact our R&D engineer Per Johansson (e-mail: per.johansson@gedevelop.com) he will collect your request and evaluate the overall market needs.

Med Vänlig Hälsning / Best Regards / Mit freundlichen Grüßen / 祝你每天愉快

Per Bäckström
